

**Disease outbreak!****4 November 2008, 7–9 pm**

In the depths of the city, a silent killer waits for a new victim. It lies unseen and undisturbed until a body is discovered in an abandoned vault. Within days, people fall sick with a strange and hideous disease. What is this unseen killer and how can it be stopped before an outbreak is unleashed? Join us to contain a virtual disease in our special scenario event. Help us to identify the infection, its origins and how to control it, using the actual techniques our scientists and medics use in real-life situations. We need your help!

***Tuesday 4th November, 7-9pm 2008 at the Royal College of Pathologists, 2 Carlton House Terrace, London, SW1Y 5AF.***

This is a **FREE** event, part of the first National Pathology Week ([www.nationalpathologyweek.org](http://www.nationalpathologyweek.org)), supported by the Royal College of Pathologists and the Natural History Museum. For more information on this event and to book a place please contact Ruth Semple, [ruth.semple@rcpath.org](mailto:ruth.semple@rcpath.org) or 020 7451 6753 to reserve a place.
